Deploy

Prof. Dr. João Paulo Lemos Escola
Copyright© 2026

O que veremos?

- Cadastro no serviço **Python Anywhere;**
- Como fazer **deploy** da aplicação na Web.

O que é deploy?

- Colocar a aplicação no ar (em produção);
- **Implantar** o sistema para o cliente ou testes;
- Existem diversos serviços gratuitos/pagos;
- Vamos utilizar um serviço free:
  - Python Anywhere

https://www.pythonanywhere.com

Send feedback Forums Help Blog **Pricing & signup** Log in

pythonanywhere
by ANACONDA.

Host, run, and code Python in the cloud!

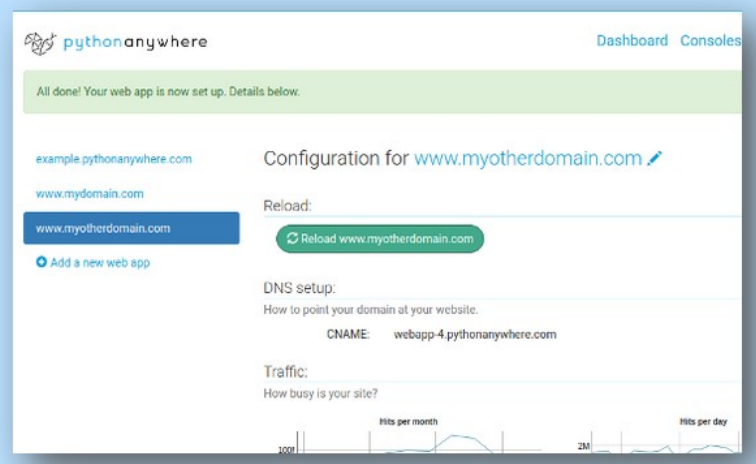

Get started for free. Our basic plan gives you access to machines with a full Python environment already installed. You can develop and host your website or any other code directly from your browser without having to install software or manage your own server.

Need more power? Upgraded plans start at $5/month.

Start running Python online in less than a minute! »

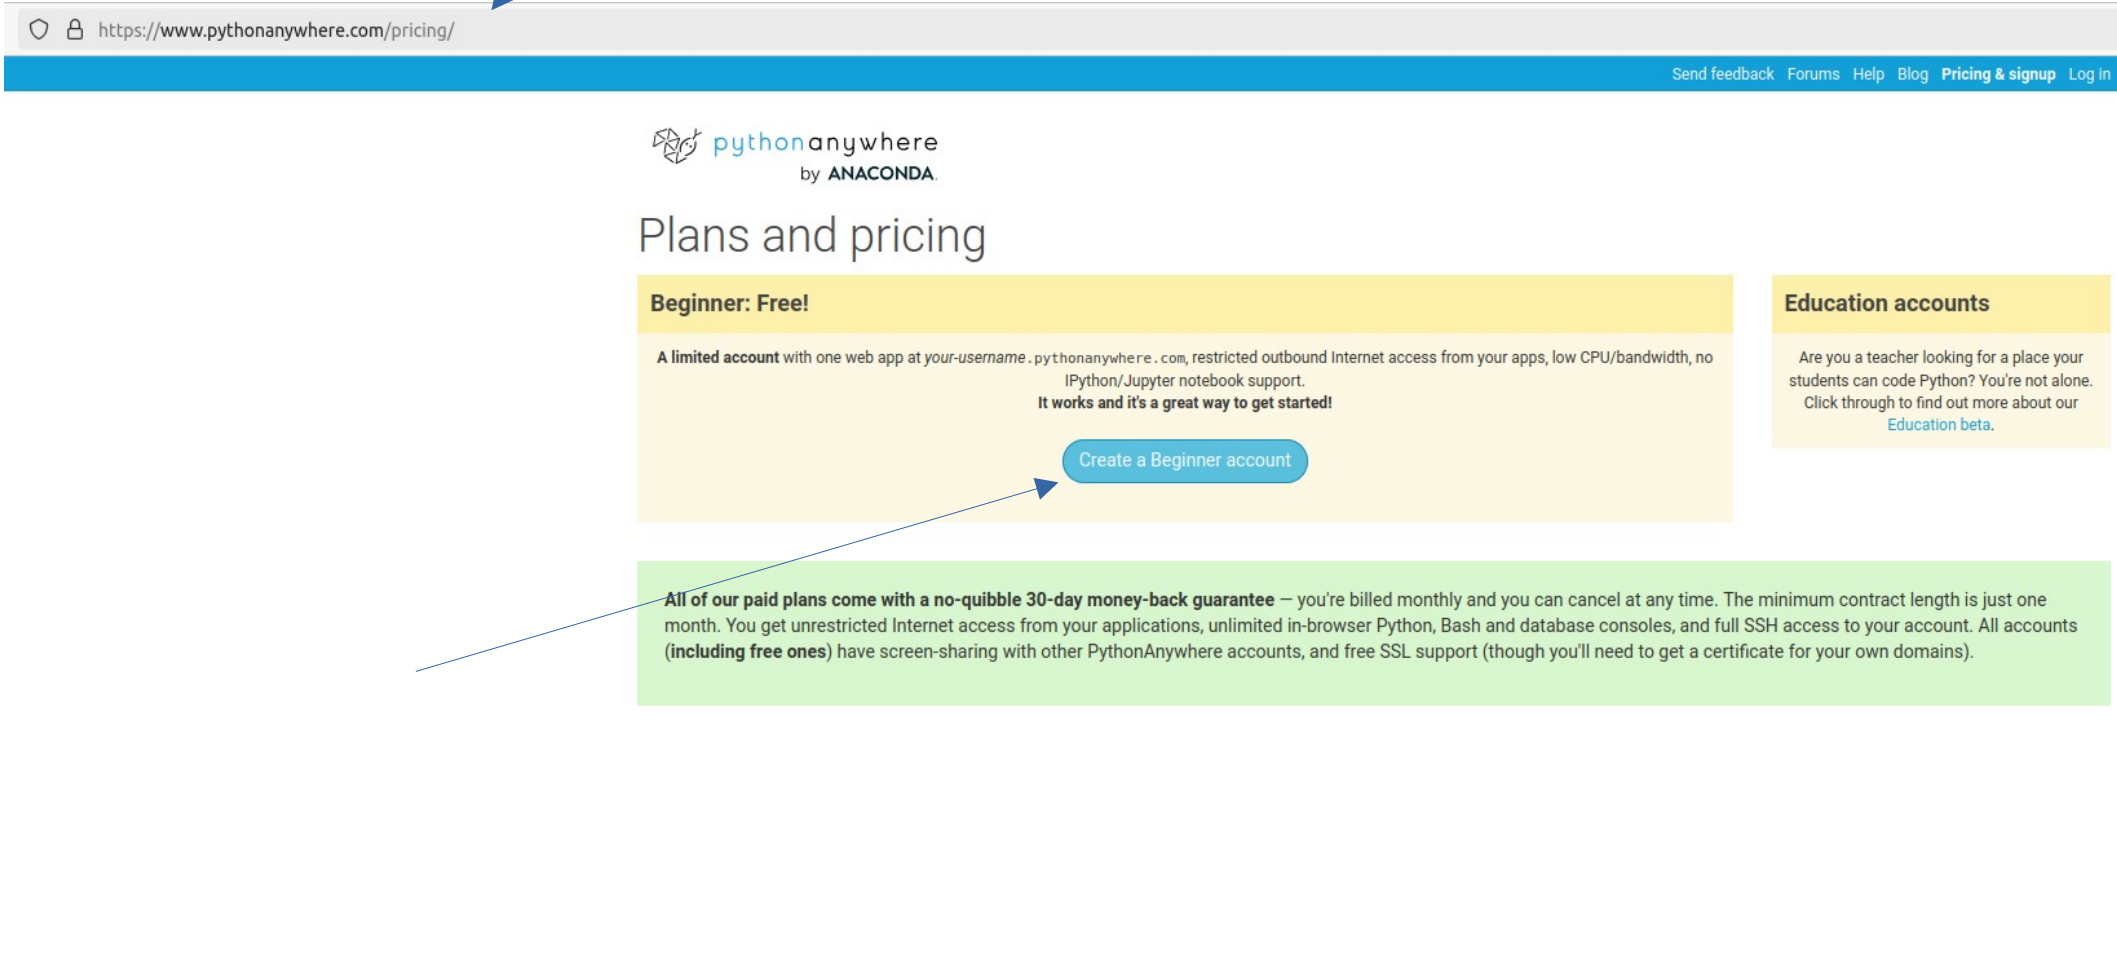

Watch our short video »

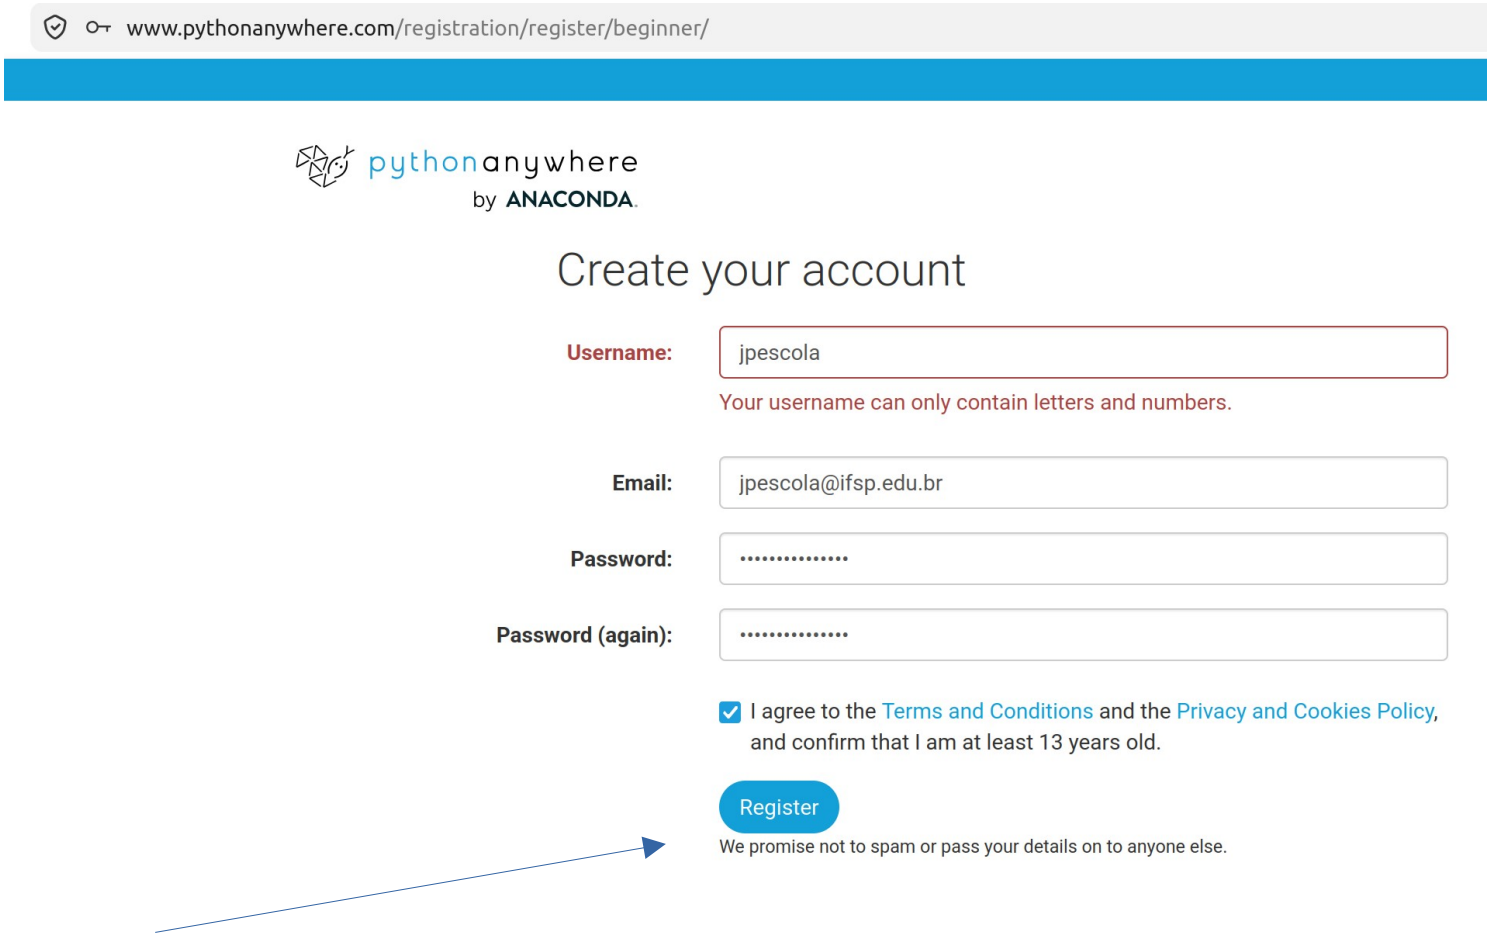

Not convinced? Read what our users are saying!

	Custom: $5 to $500/month	Startup: $99/month	Web Developer: $12/month	Hacker: $5/month	Beginner: $0/month

Hi jpescola2,

Thanks for signing up for PythonAnywhere!

Please click this link to confirm your email address. This means you will be able to reset your password if you forget it later, which is especially important if you have a paid account!

If you can't click the link from your email program, please copy this URL and paste it into your web browser:

https://www.pythonanywhere.com/registration/confirm_email/b77c03155ac5d621278cf9bb84334ce168dd607076777b185107f85a/

If you don't want to use PythonAnywhere, just ignore this message and we won't bother you again.

Cheers,

The PythonAnywhere team

Warning You have not confirmed your email address yet. This means that you will not be able to reset your password if you lose it. If you cannot find your confirmation email anymore, send yourself a new one here.

Reload jpescola.pythonanywhere.com
Best before date:
We're happy to host your free website -- and keep it free -- for as long as you want to keep it running, but you'll need to log in at least once every three months and click the "Run until 3 months from today" button below. We'll send you an email a week before the site is disabled so that you don't forget to do that. See here for more details.
This site will be disabled on Friday 13 June 2025
Run until 3 months from today
Paying users' sites stay up forever without any need to log in to keep them running.
O projeto foi criado com sucesso!

django

View release notes for Django 4.0

The install worked successfully! Congratulations!

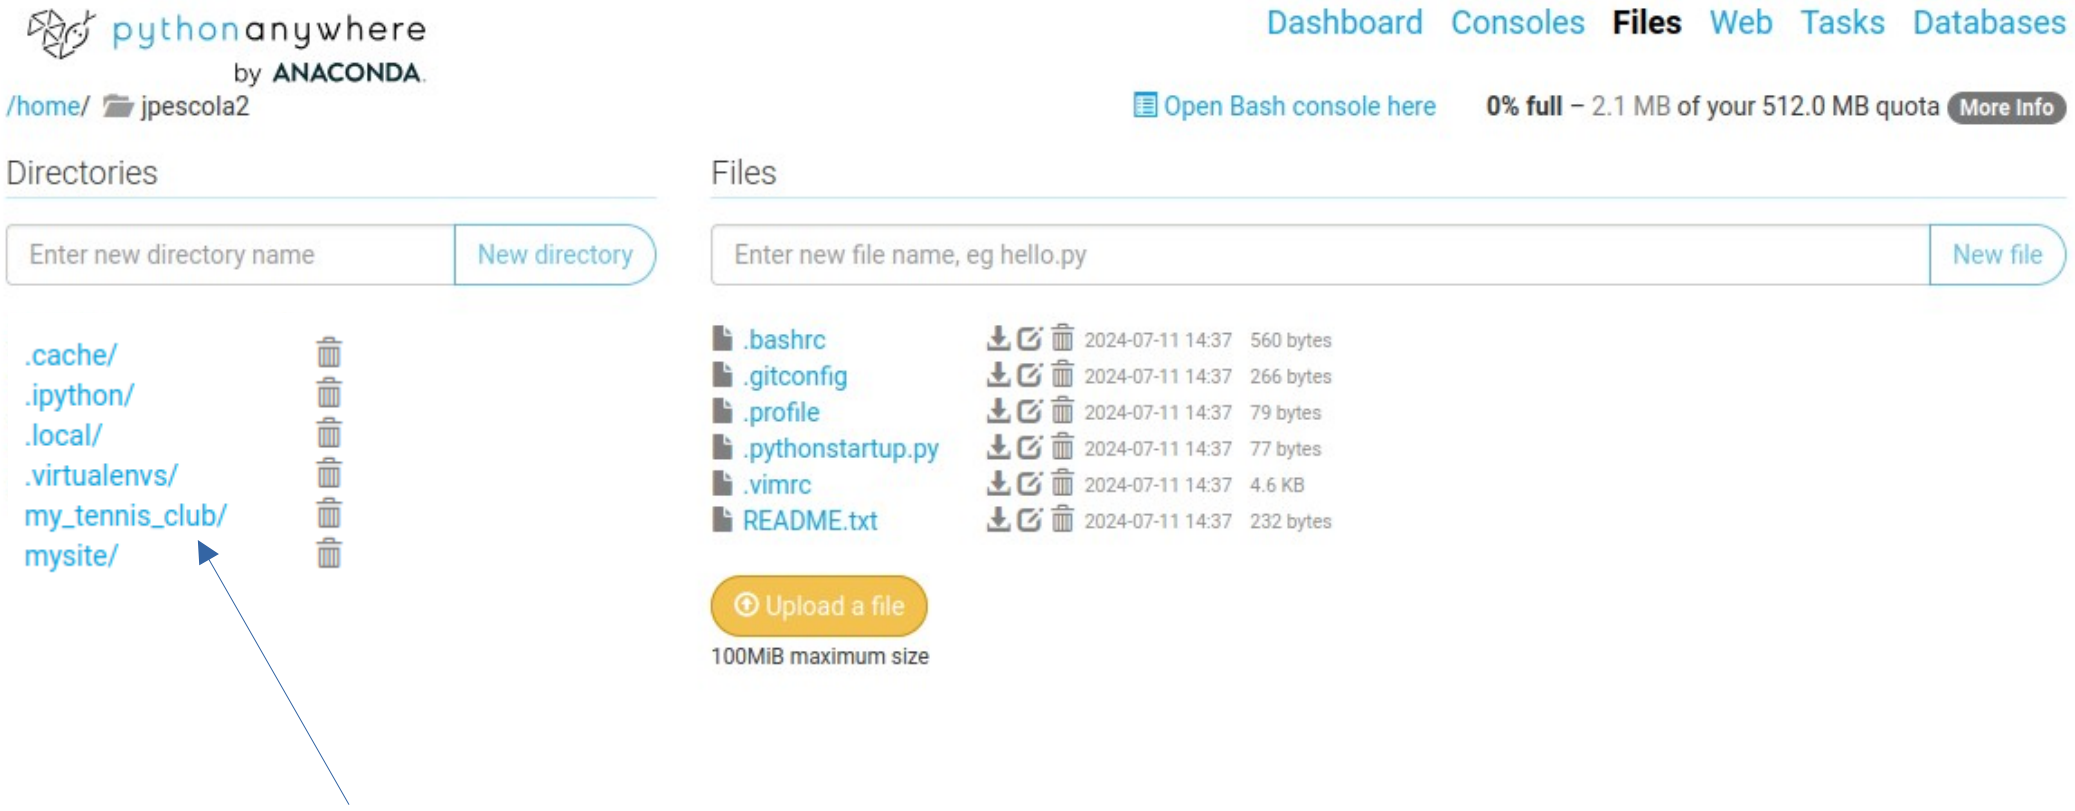

You are seeing this page because DEBUG=True is in your settings file and you have not configured any URLs.

Barra superior

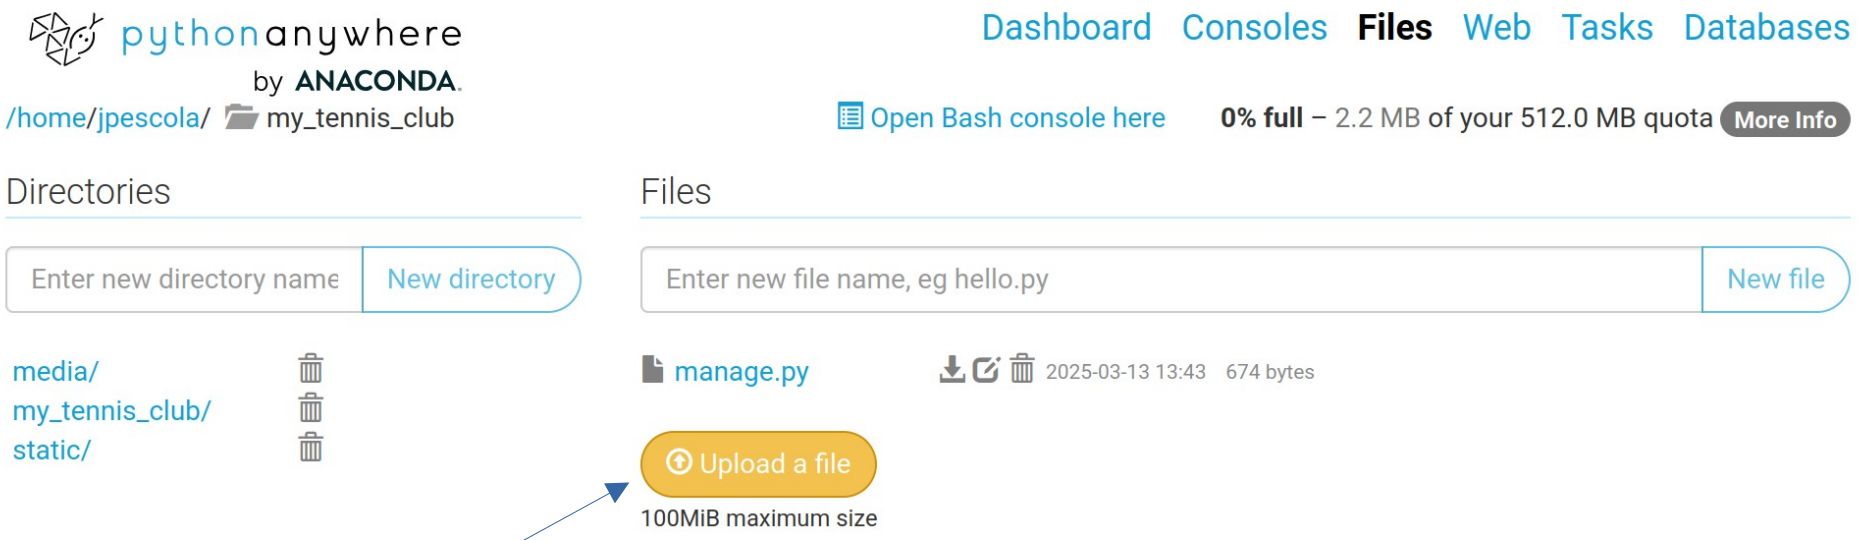

- Clique em **Files** para fazer upload do projeto.

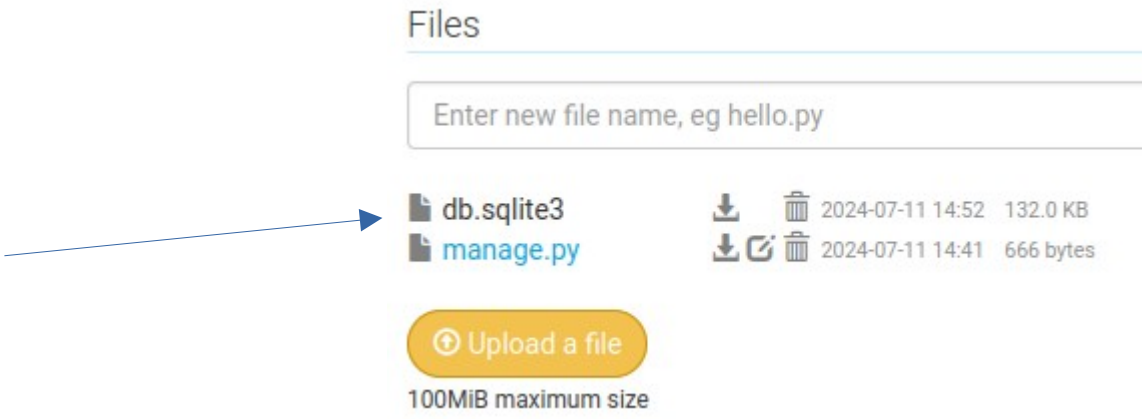

Entre na pasta do projeto

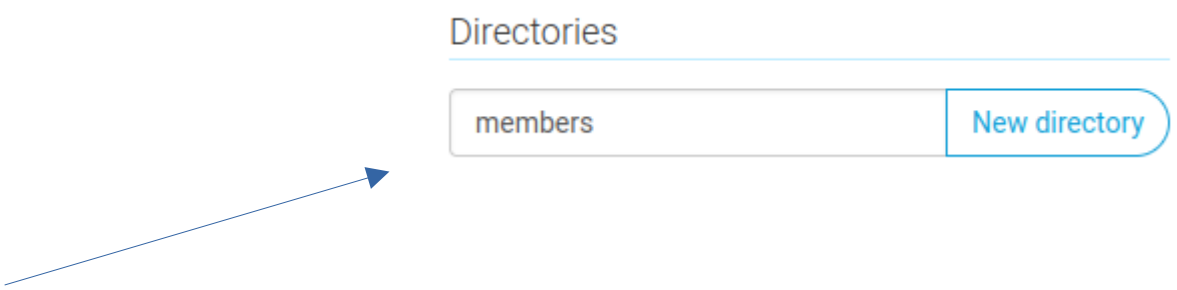

Botão de upload

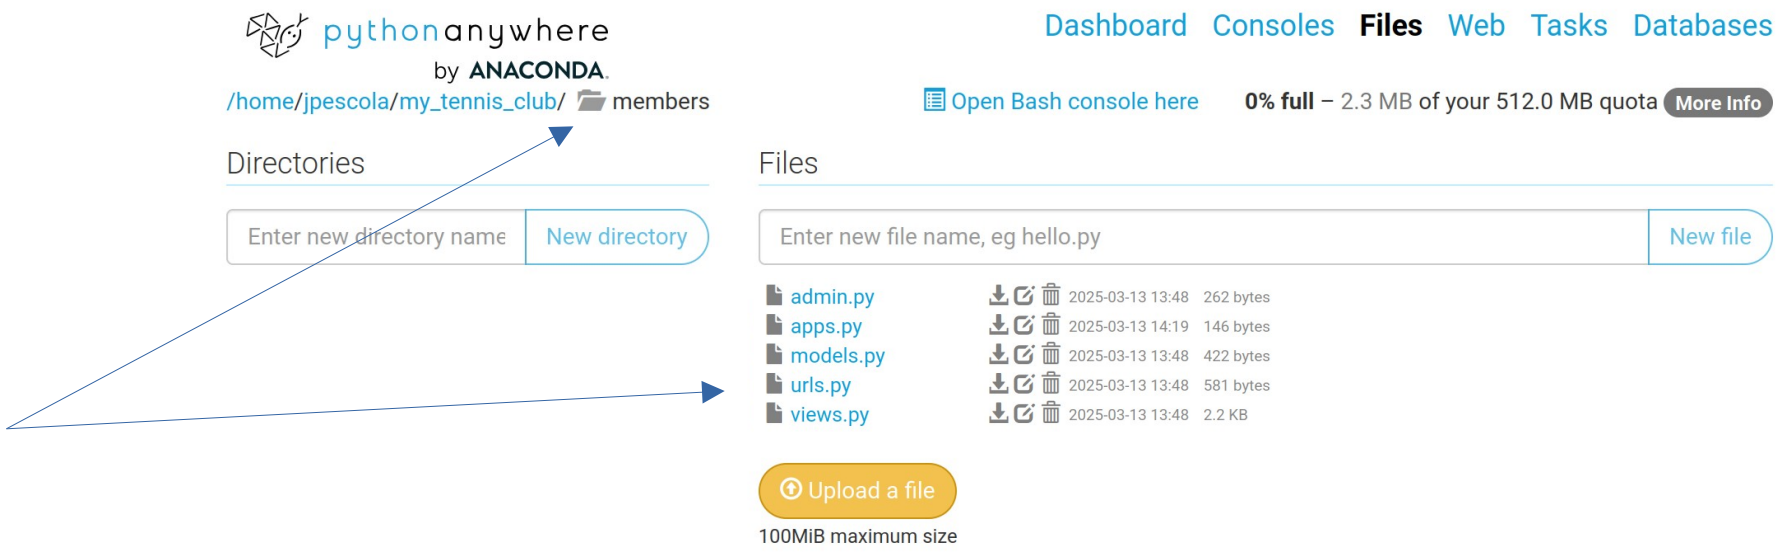

Faça upload do db.sqlite3

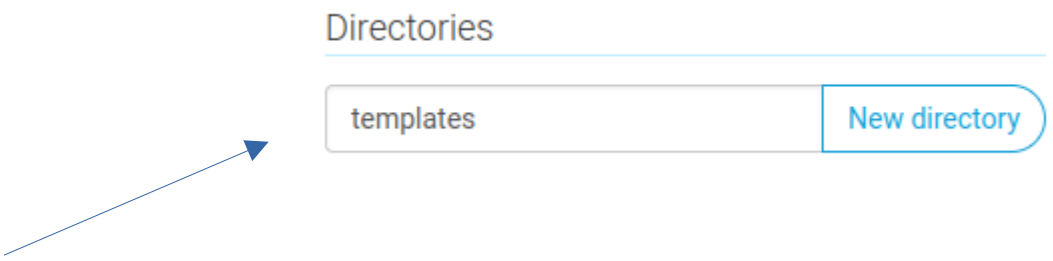

Crie a pasta members

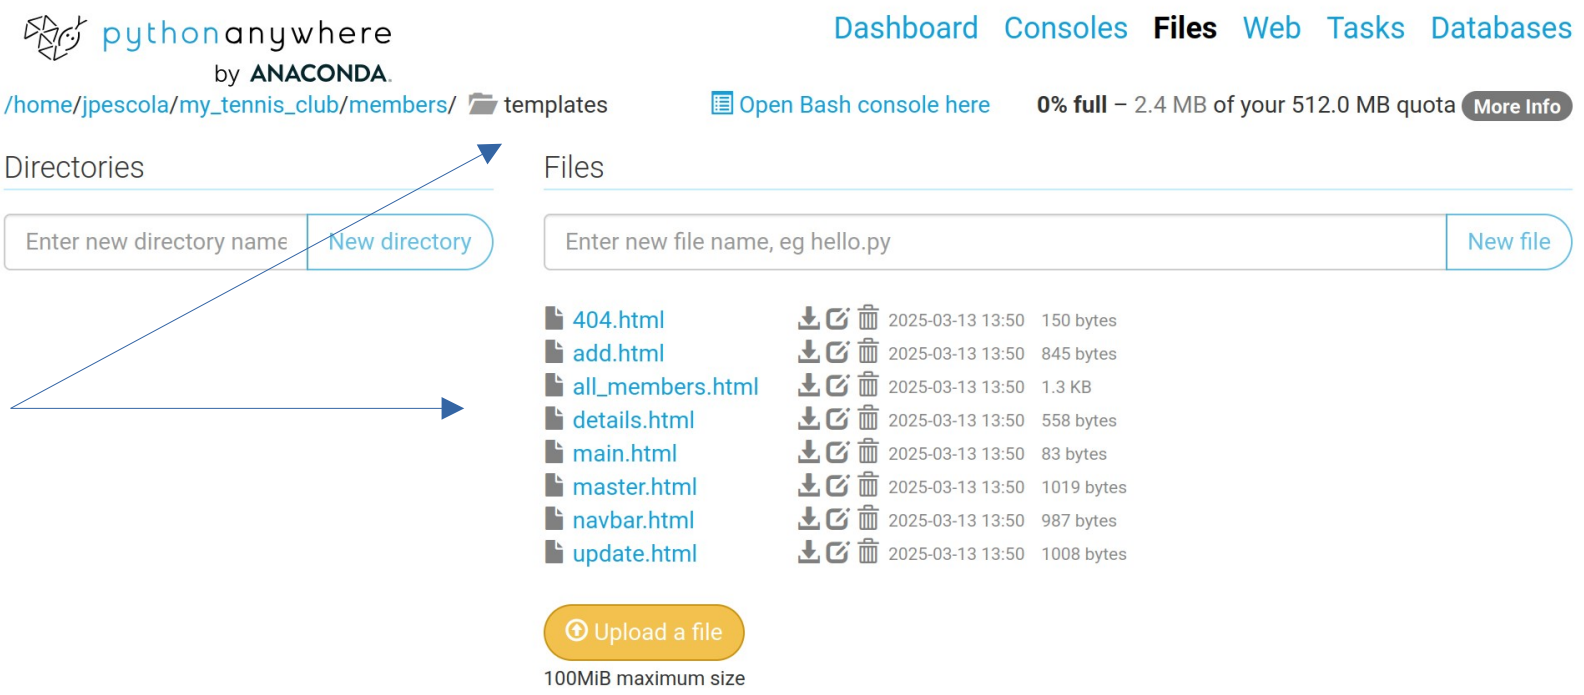

Faça upload dos arquivos da pasta members

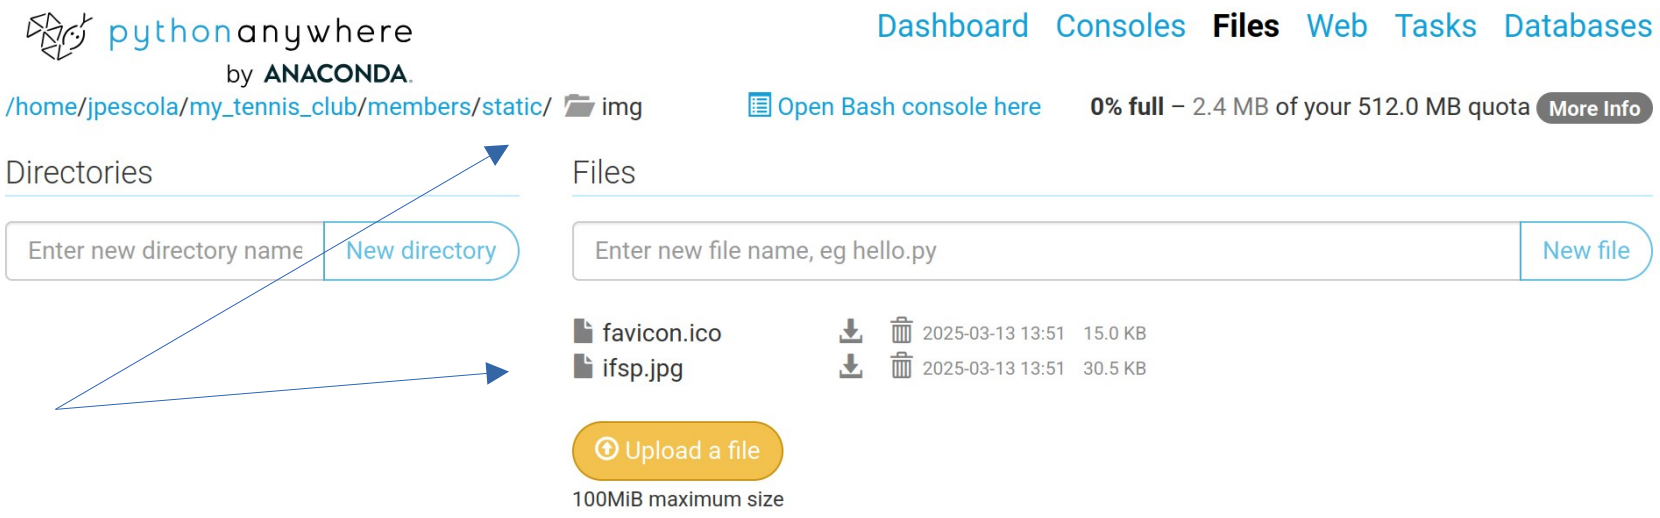

Crie a pasta templates

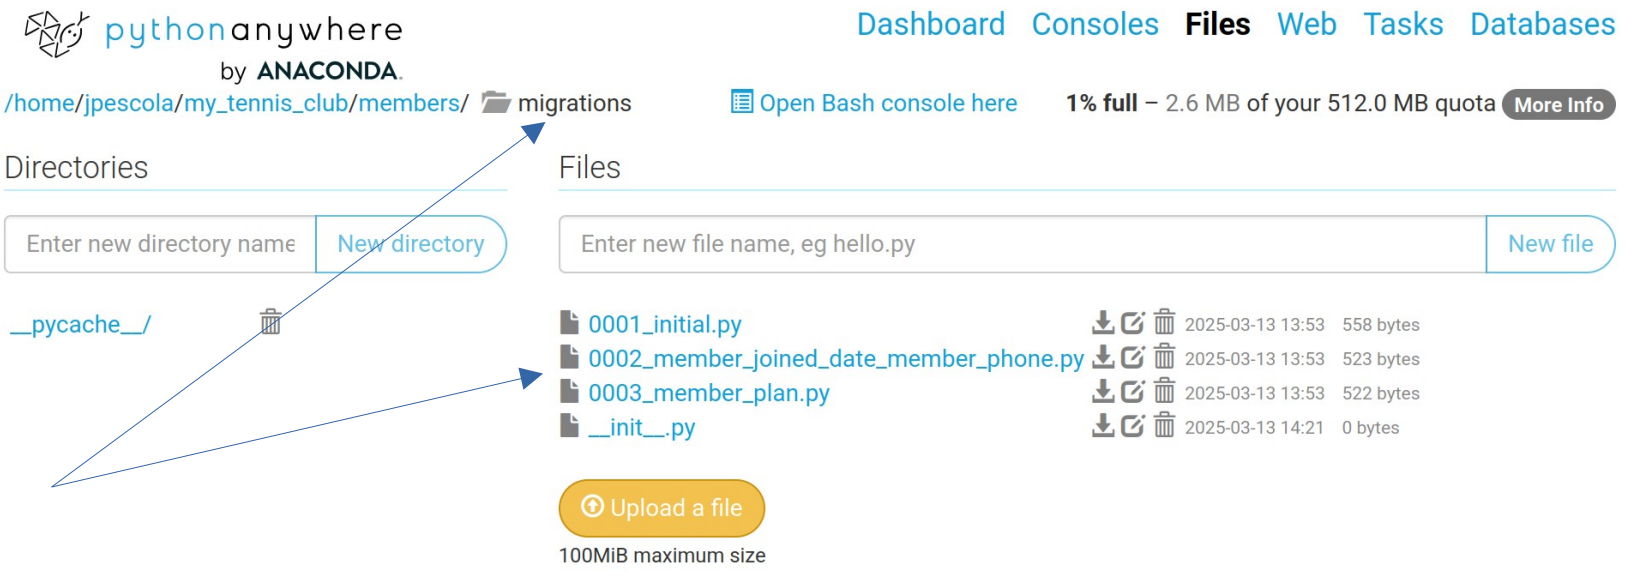

Suba os templates

Pasta ‘static’ e subpastas

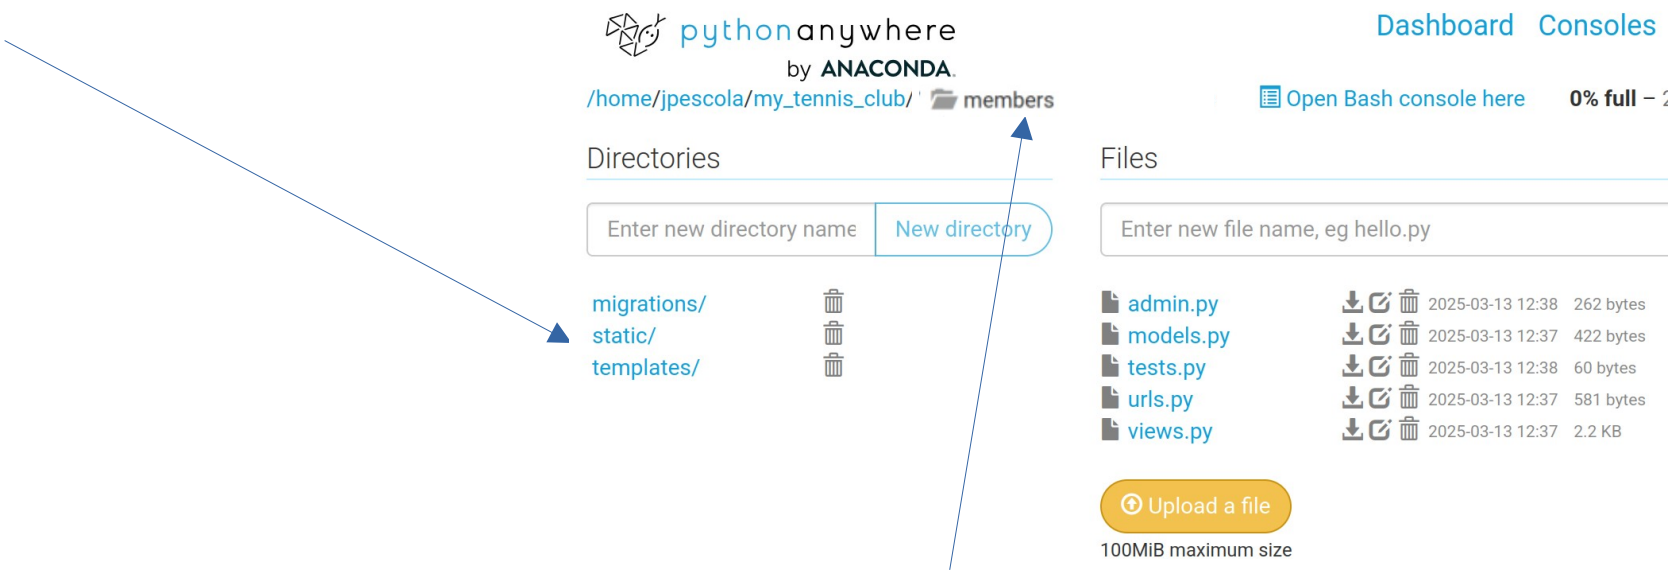

Pasta ‘migrations’

Subdiretórios

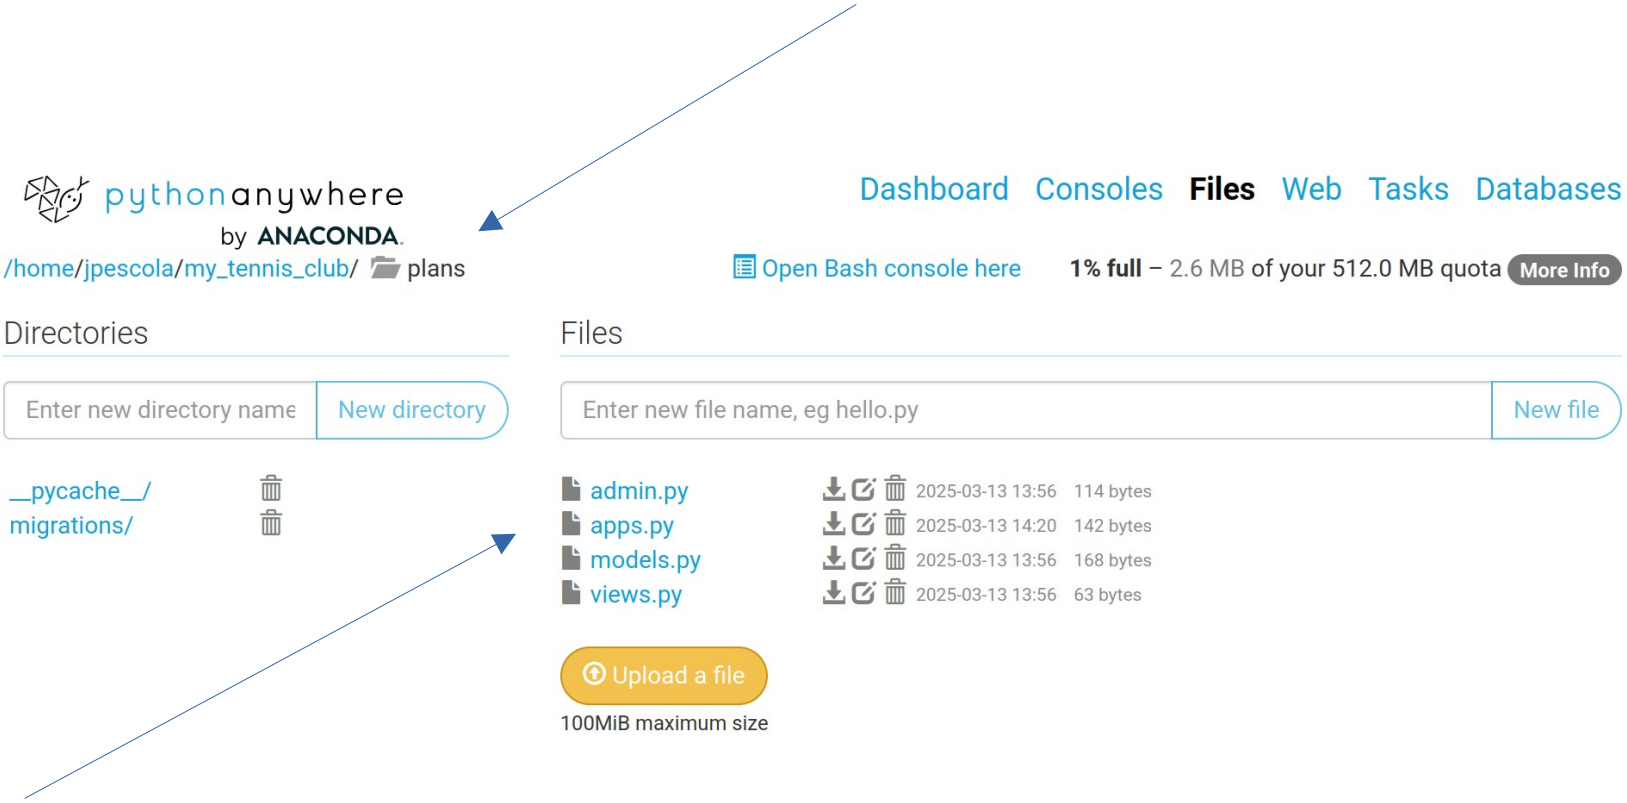

- Confira se criou os diretórios corretamente:

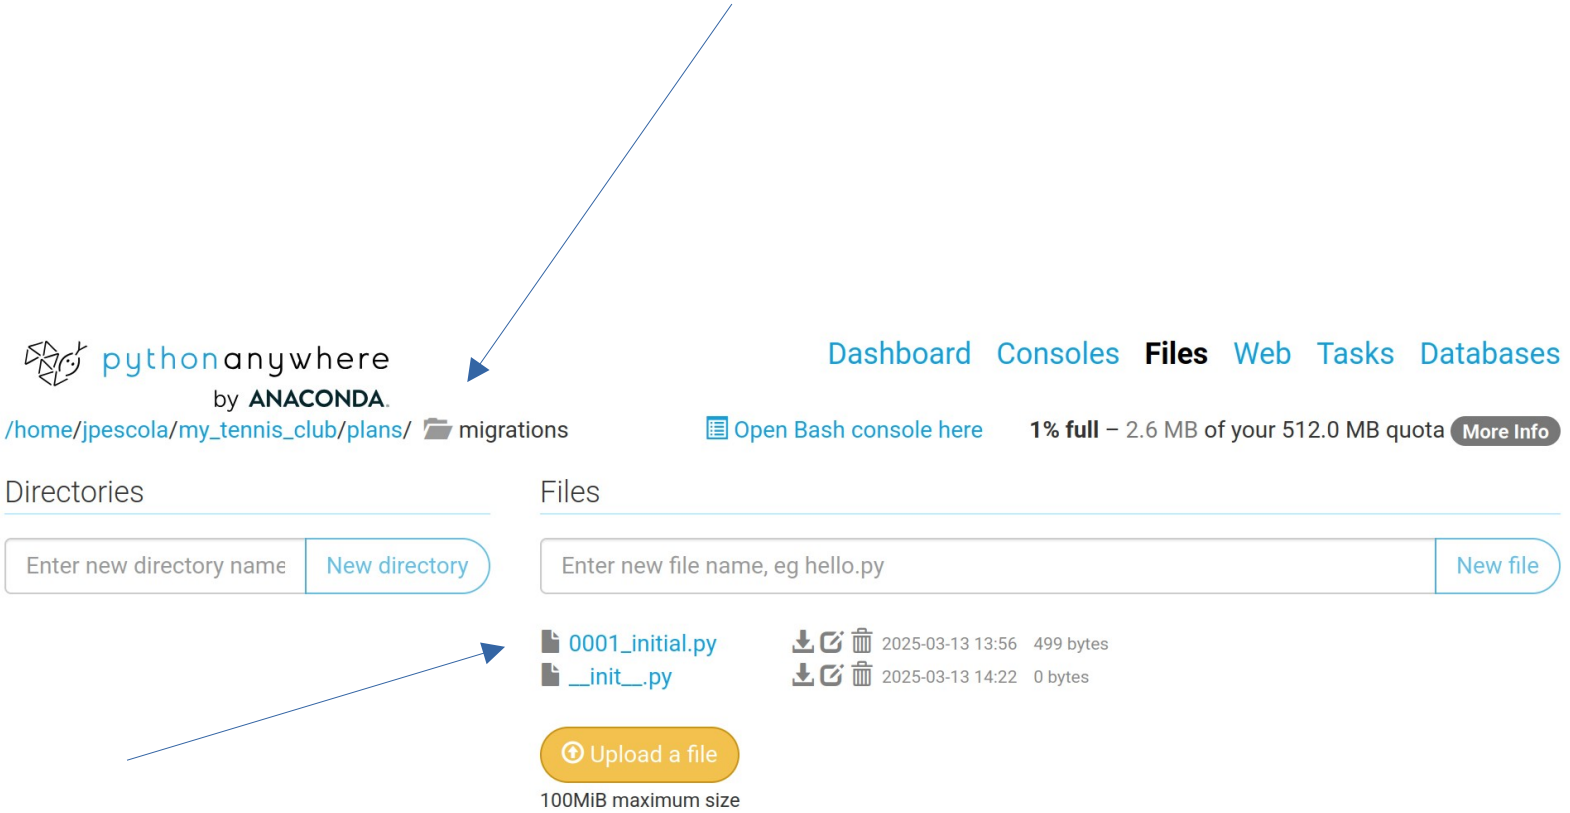

Atenção: essas pastas devem ser criadas em ‘members’.

Módulo ‘plans’

- Repita os procedimentos para o módulo ‘plans’ e todos os outros que existirem no projeto:
  - Crie a pasta ‘plans’ em ‘my_tennis_club’;
  - Crie os subdiretórios ‘migrations’, ‘static’ (se existir) e ‘templates’ (se existir);
  - Faça upload dos arquivos de cada diretório.

O que fazer quando há problemas?

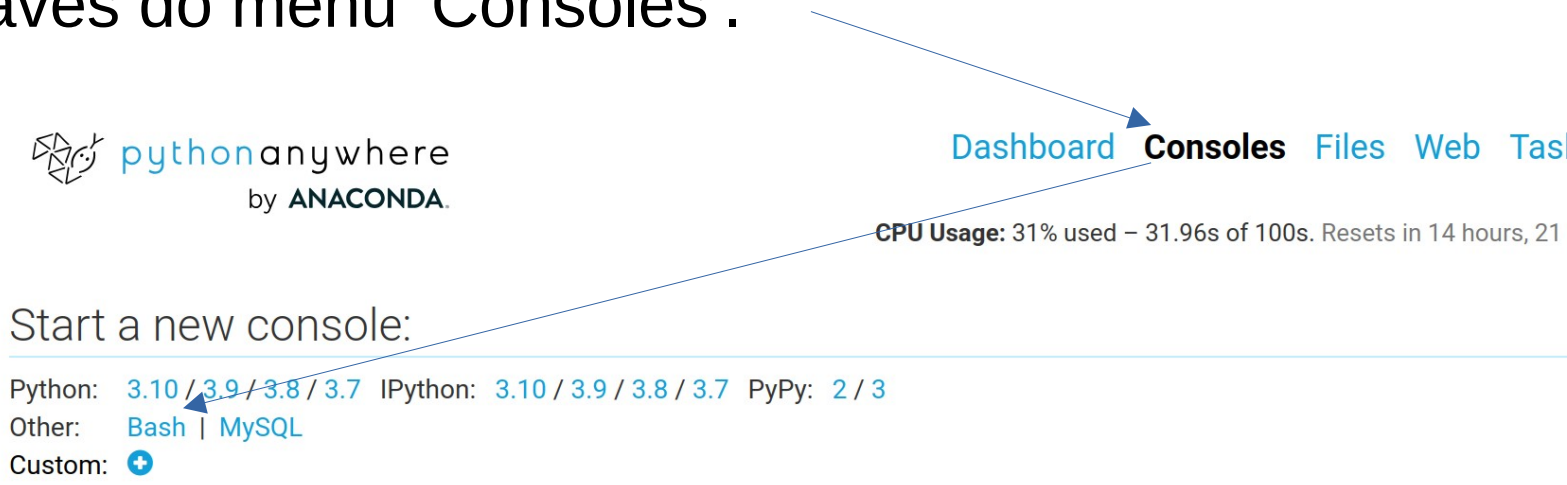

- Caso seu sistema não esteja funcionando, você precisa descobrir o motivo;
- Para isso existem os arquivos de log;
- Eles registram tudo que acontece no sistema;
- Esses arquivos estão disponíveis no menu Web.

Arquivos de registro (Log)

A pasta migrations é mesmo necessária?

- Sim!
- Caso seja necessária alguma alteração em algum model, será necessário migrar para não perder os dados armazenados online;
- Os comandos de migração podem ser executados no servidor através do menu ‘Consoles’.

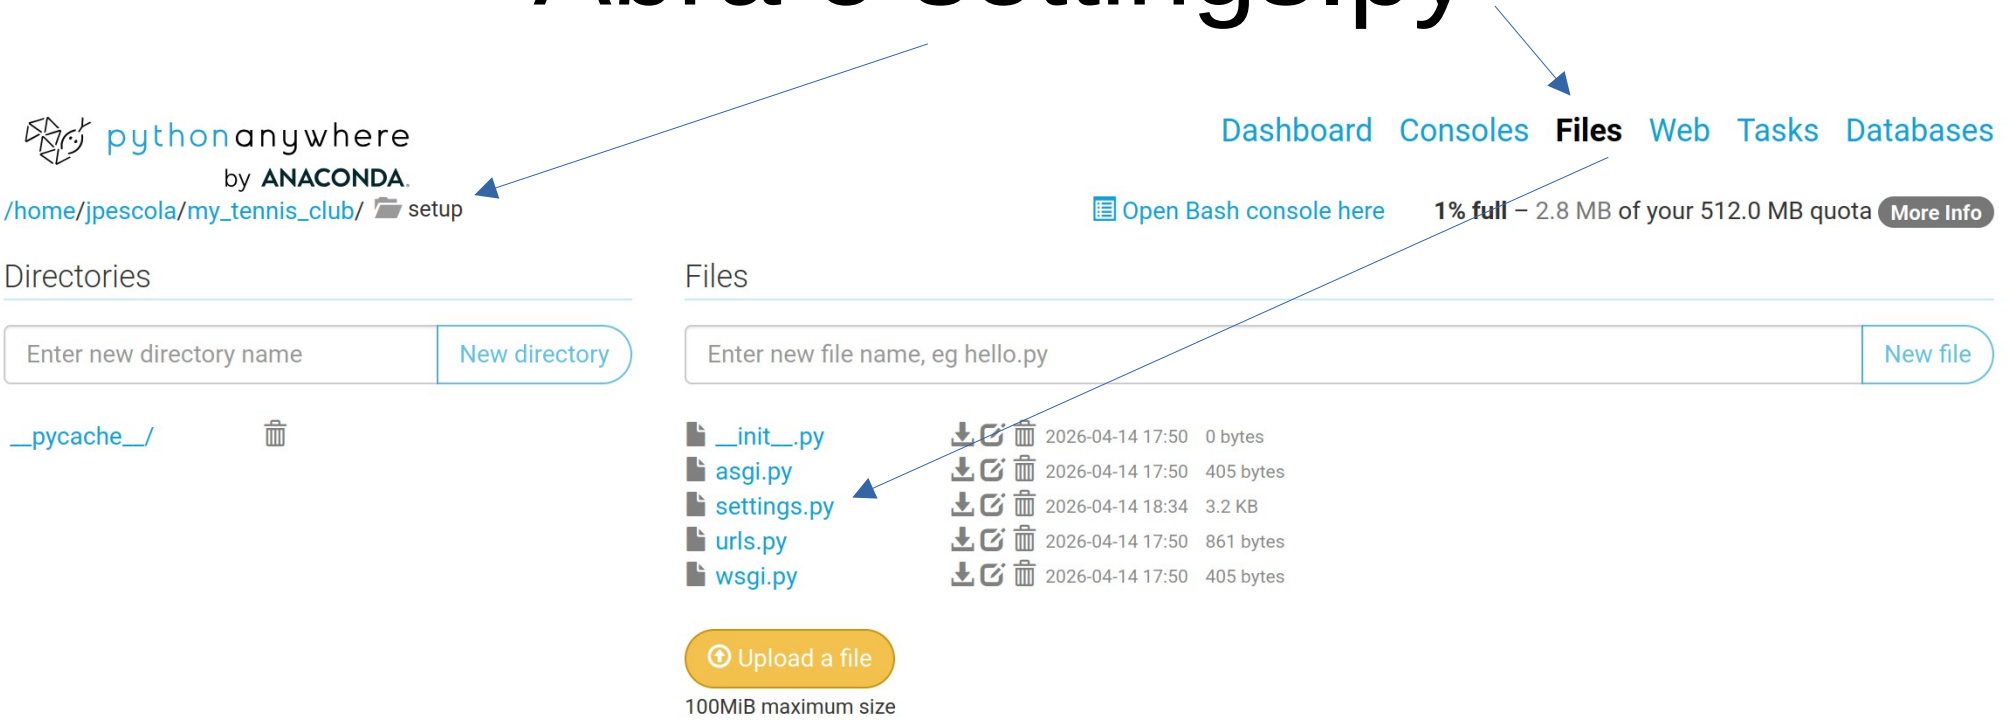

DisallowedHost

- O que fazer se surgir esse erro?
  - Falta habilitar outros hosts no settings.py

Abra o settings.py

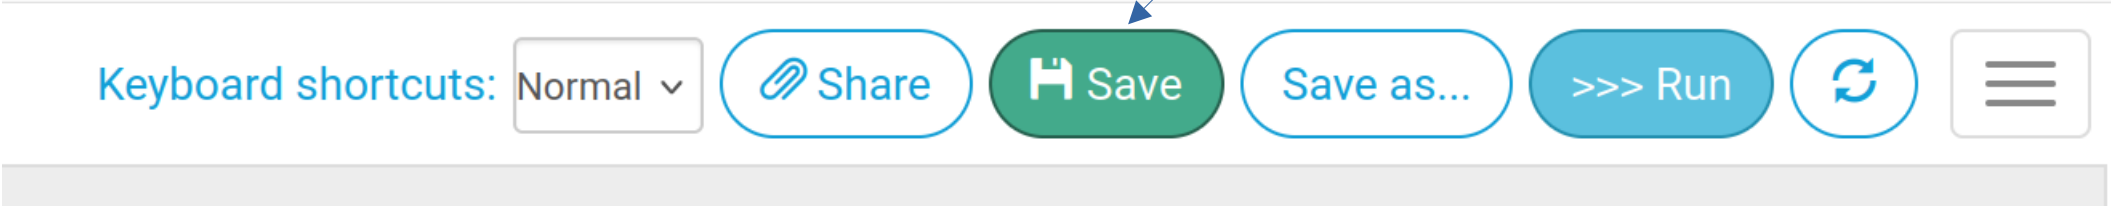

/home/jpescola/my_tennis_club/my_tennis_club/settings.py

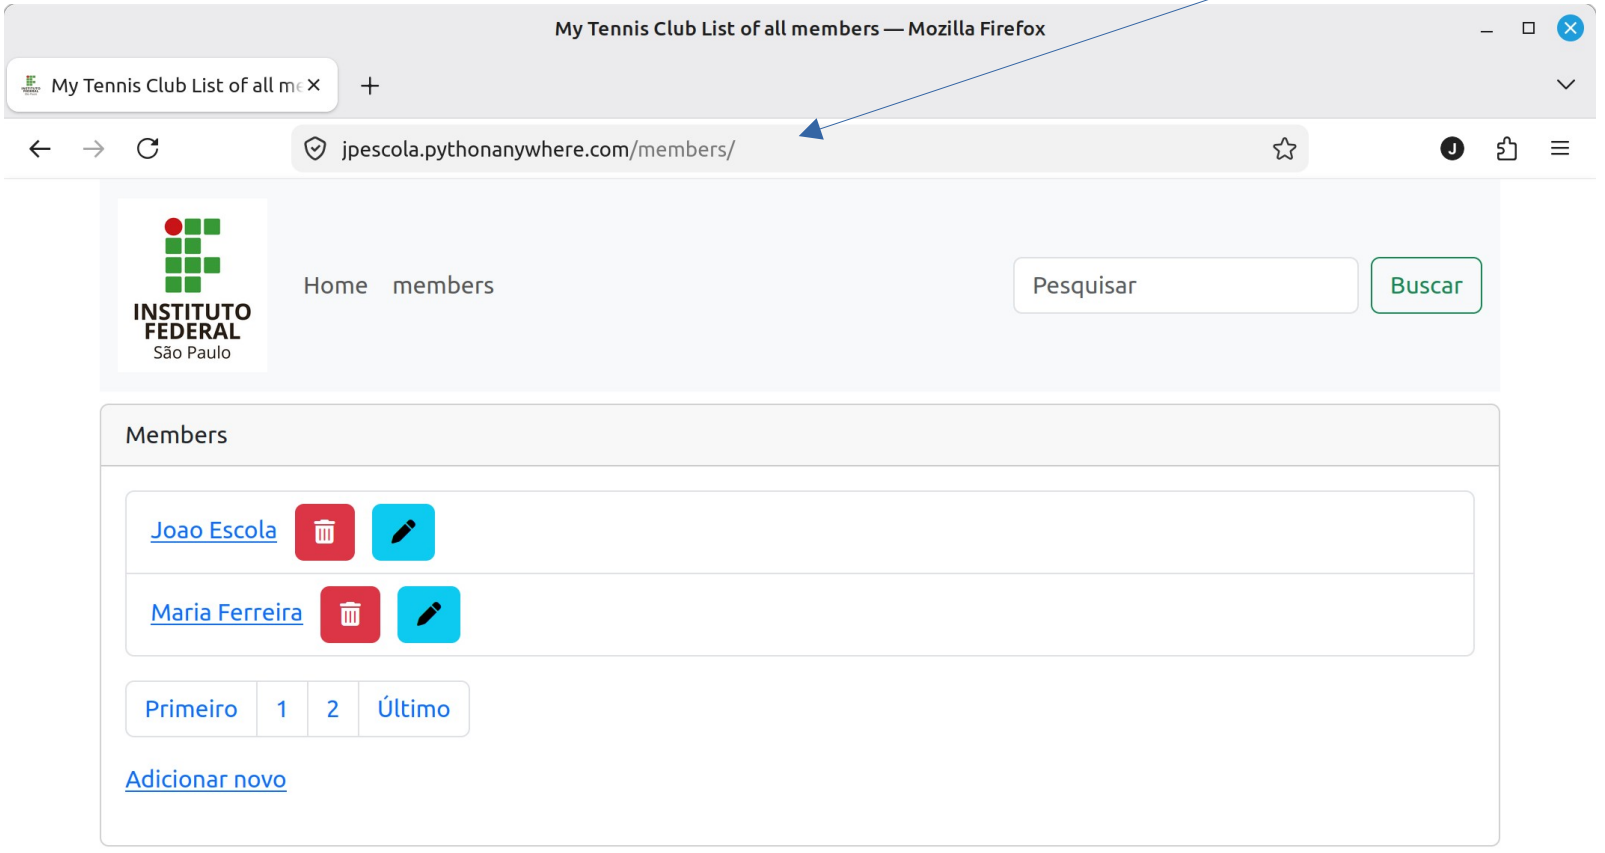

e adicione
o asterisco

```
7   https://docs.djangoproject.com/en/6.0/topics/settings/
8
9   For the full list of settings and their values, see
10  https://docs.djangoproject.com/en/6.0/ref/settings/
11  """
12
13  from pathlib import Path
14
15  # Build paths inside the project like this: BASE_DIR / 'subdir'.
16  BASE_DIR = Path(__file__).resolve().parent.parent
17

Arquivos estáticos (static)

- Clique no Menu Web;
- Veja que o servidor centraliza os arquivos estáticos em um único diretório;
- No console, digite o comando **python manage.py collectstatic** para copiar os arquivos da pasta ‘static’ de cada módulo, para a pasta ‘static’ do servidor.

pythonanywhere

Para praticar...

- Publique seu sistema no PythonAnywhere;
- Ele ficará disponível no link gerado;
- Pelo menos a cada 30 dias, será necessário revalidar o sistema para que não saia do ar.

O que vimos?

- Cadastro no serviço **Python Anywhere;**
- Como fazer **deploy** da aplicação na Web.
